Interview with my client

1. Could you please introduce the activities in your club?

Basically, we help feral cats. When someone finds a cat needed help, they will tell other members in the club and see if someone can help the cat. After this, they will continue to help this cat and look for other cats needed help as well.

2. In the everyday running of your activities, what difficulties have you met?

We currently share the information for new cats in help in a WeChat group, but the information always be disturbed by chatting so it is hard for some members to see it. Besides, there is no place for us to share the activity we have done and the current situation of cats. I think it would be better for us to have a platform to share information.

3. Speaking of the lack of platform for sharing of deeds, do you mean that it would be convenient to have a platform for your club that supports the updating of your activities?

Yes, and it has better to be easy and convenient to use.

4. I am able to do that for you. In addition to the sharing function, what else function do you need?

I want others to know who has posted the information and the how to contact him/her. Plus, I would like to filter out the unrelated information.

5. I think log in and creating profile function would work for your first request. For the second one, do you think the related picture would be containing cats?

I do think so, so can you only allow pictures with cat in them to be posted?

6. Yes, and will a website with log in, posting function with filter be suitable for the platform?

Sure.
